

Mission

Veteran "Bone-Setter" for human-centric infrastructure with 9+ years of experience in high-stakes operational leadership, including 5 years specifically within healthcare systems. Expert in bridging the gap between clinical intent and technical reality through dbt-driven pipelines, EHR configuration (Epic), and continuous quality improvement (CQI) for systems serving over 18,000 patients.

Education

Master of Science in Quantitative Methods and Modeling
Baruch College, Zicklin School of Business, New York, NY

Expected May 2026

Relevant Coursework Highlights:

GPA: 3.431

- Advanced Statistical Computing
- Econometrics and Forecasting
- Machine Learning for Business Analytics
- Database Design & Management

Bachelor of Arts in French, minor in Art History
Francis Marion University, Florence, SC

GPA: 3.633

Technical Skills

Implementation & Configuration: SaaS Platform Onboarding, User Provisioning & Permissions, Requirement Translation, Enterprise EHR Governance (Epic, NextGen, Connect2).

The Data Engine: dbt (Data Build Tool), BigQuery, SQL (PostgreSQL/MySQL), YAML, API/Integration Logic, Kimball Star Schema Modeling.

Lifecycle & Delivery: Agile/SDLC, User Acceptance Testing (UAT) Lead, Technical Documentation, Stakeholder Enablement.

Quantitative Methods & Academic Projects

Cloud-Based ELT Pipeline Architecture / Current Project (CIS 9440 Data Warehousing and Analytics)

- **System Architecture:** Designing end-to-end ELT pipelines that prove platform ROI by ensuring logical data relationships and high-performance analytics for community partners.
- **Dimensional Modeling:** Mapping schemas and building foundational database models utilizing Kimball Theory (Star Schema) to ensure high-performance analytics and logical data relationships.
- **Geospatial Insights:** Analyzing operational trends across NYC to uncover geospatial "pain points", a logic directly transferable to routing and logistics challenges.

Clinical Decision Support Tool / NYC Provider Referral Visualization & Applied Academic Project (CIS 9655 Data Visualization)

- **Data Integration:** Architecting a pipeline to ingest public NYS Medicaid/Medicare datasets into BigQuery; utilizing dbt and YAML to transform disparate NPI data into a single Source of Truth for community referrals.
- **Geospatial Visualization:** Developed an interactive dashboard to map provider density and insurance eligibility across NYC regions, enabling therapists to identify accessible local care for patients in real-time.
- **Referral Optimization:** Engineered a logic-driven solution to bridge "referral gaps" by filtering providers by specialty, title, and geographic proximity to reduce friction in the patient-provider matching process.

Healthcare System Simulation & Analysis / Academic Project (OPR 9730 Simul Model & Analy)

- **Systems Theory:** Conducted a comprehensive meta-analysis of health insurance system modeling, evaluating the limitations of silos of care and resource management.
- **Demand Forecasting & Queueing Models:** Developed queueing models utilizing Monte Carlo simulations and Poisson distribution methods in Excel to identify operational bottlenecks and improve system efficiency.

Epidemiological Data Mining & Predictive Modeling / Current Project (CIS 9660 Data Mining for Business Analy)

- **Geospatial Modeling:** Designing a predictive analysis of NYC HIV infection rates and PrEP preventative measures using NYC Open Data to identify key geospatial and demographic factors.
- **Model Validation:** Applying advanced statistical methods, including Logistic Regression, K-fold Cross-Validation, and Leave-One-Out Cross-Validation (LOOCV), to validate model accuracy and reliability.

Clinical Operational Database Design / Academic Project (CIS 9340 Principles of Database Management)

- **Architectural Problem Solving:** Engineered a relational database schema from the ground up to solve a legacy clinical reporting "pain point," translating abstract manager requirements into a logical data model.
- **Schema Optimization:** Designed and optimized SQL queries and normalized tables to support complex cross-provider reporting, ensuring data accuracy and actionable business insights.
- **Stakeholder Enablement:** Bridged the gap between clinical intent and technical implementation, creating a Source of Truth architecture intended to mitigate reporting friction.

Professional Experience

Lead Patient Care Associate (Implementation Consultant) | Callen-Lorde | 2021–2026

- **C-Suite Strategic Advisory:** Partnered directly with the CEO and COO as a union delegate and clinical leader to advocate for operational integrity during an enterprise-wide Epic migration; ensured system configurations protected the needs of an 18,000-patient ecosystem.
- **Workflow Translation & Specification:** Identified the operational root causes of data flow failures and translated clinical friction into actionable technical specifications for the Community Health Analytics (CHA) team.
- **Performance Infrastructure Advocacy:** Directed peer-led troubleshooting and technical audits to mitigate "success bias" in implementation protocols, safeguarding service continuity for a 1,500-patient Behavioral Health network.

The Standard & ABCV | 2015–2021

F&B Reservation Agent & Event Coordinator | The Standard

- **Reporting Integrity & Logic:** Managed high-volume reservation logic and CRM data integrity for six international properties, ensuring the accurate reporting needed to mitigate churn and enable seamless business processes.
- **Data Quality Management:** Managed high-fidelity record validation within global CRM platforms to facilitate partner training and enablement, ensuring a high track record of engagement and satisfaction.

Front of House / Server | The Standard & ABCV

- **Resource Logistics & TPM:** Specialized in the rapid assessment and deployment of resources to meet fluctuating demand in high-concurrency environments, applying foundational logic to resource routing and capacity planning.

Senior Program & Account Lead | Del Monsoon | 2010–2019

- **Consultative Program Delivery:** Directed the end-to-end lifecycle management for high-net-worth accounts, ensuring 100% accuracy in contract fulfillment and resource allocation for events with 1,000+ attendees.
- **Financial Operations:** Managed project spend, invoicing, and vendor logistics for large-scale operations, identifying organic growth opportunities that generated a \$60K+ new-business stream.
- **Leadership:** Supervised cross-functional teams of 20–40 personnel, maintaining operational continuity under extreme pressure.
- **CRM & Marketing Analytics:** Managed high-fidelity operational data for large-scale projects, utilizing CRM systems to automate reporting and drive data-driven decision-making for high-net-worth accounts.

Community Leadership

Co-Founder & Event Producer | Queer Roots Cinema | 2021–Present

- **End-to-End Production:** Co-founded and manage all event production for a recurring intergenerational film club, coordinating schedules and communications for a 30-member roster.
- **Program Design:** Design and facilitate comprehensive event programming, including social hours, screenings, and 2-hour post-film discussions, while cultivating an inclusive space for diverse attendees.

Additional Skills & Certifications

- Alteryx Designer Core Certification
Alteryx
- Certified Teaching English as a Second or Foreign Language/ESL Language Instructor
Literacy Assistance Center Academy, New York, NY
- Certified DELF A1/A2
Université de Caen Basse-Normandie, Caen, France
- Certified COVID-19 Contact Tracer
Johns Hopkins University, Coursera.org

Self-Care Methods

- Continual academic pursuit purely for the joy of learning
- Dance classes where my body can heal mentally and physically
- Running and participating in tabletop role playing games to experience catharsis
- Mutual aid fundraising and community actions to practice humanism
