[Hiring Manager Name or "Hiring Team"]

[Company Name]

[Company Address]

Re: [Job Title] Application

Dear [Hiring Manager Name or "Hiring Team"],

I am writing to express my strong interest in the [Job Title] position at [Company Name]. As a Quantitative Modeler and Operations Architect with 15 years of experience diagnosing broken systems, from 100+ person decentralized teams to 18,000-patient healthcare migrations, I build data pipelines and analytical frameworks that prioritize frontline workflow reality over board-room vanity metrics. My MS in Quantitative Methods & Modeling from Baruch College has equipped me with the technical rigor to complement my operational depth.

Technically, I bring [2–3 specific skills from the job description]. For example, in my [CIP/SDOH/PEX/WHO] project, I [specific accomplishment that matches the job]. You can view the full project at my portfolio: [Portfolio URL].

Beyond the code, I bring operational maturity. I have led cross-functional teams of up to 100+ personnel, managed multi-million-dollar project logistics, and served as the bridge between frontline staff, management, and executive leadership. I don't build systems in a vacuum, I build them with the people who use them, ensuring that data solutions serve real-world workflows.

I am [intentionally relocating to the Pacific Northwest / excited to build my career in NYC's sustainability sector] and would welcome the opportunity to discuss how my combination of technical rigor and operational leadership can serve [Company Name]'s mission. Thank you for your time and consideration.

Sincerely,

Preston Carey Leslie
