Dear Members of the Selection Team,

I am writing to express my interest in the Customer Success Manager position at Everseen. As an enterprise-focused relationship strategist holding an MS in Quantitative Methods and Modeling from Baruch College, my professional execution stands at the intersection of operational leadership, data literacy, and client advocacy. I am currently executing a permanent relocation to the Portland market and am fully prepared to embrace the travel mandate required to deliver on-site value assurance, champion retail best practices, and secure long-term loyalty across your premier retail accounts.

Everseen's position as a Vision AI disruptor processing six petabytes of daily video data requires a Customer Success Manager who does not merely manage tasks, but actively owns outcomes. Protecting account health and optimizing the customer experience across global retail accounts demands an advisor who can read performance data, confidently deliver Quarterly Business Reviews (QBRs), and systematically prove a clear return on investment. My 14-year background in multi-stakeholder operations and quantitative analysis directly addresses these core focus areas:

- **Data-Driven Value Assurance & Product Adoption:** Through my graduate training in database management and predictive analytics, I possess the technical fluency to collaborate natively with your Data Analytics teams to drive seamless product adoption. I excel at interpreting complex data matrices to identify performance outliers. In my previous systems auditing workflows, I designed empirical data tracking pipelines to isolate unflagged systemic infrastructure failures that were degrading operational output. I am highly equipped to monitor key account KPIs and develop data-driven recovery plans to guarantee clients realize a clear return on investment (ROI) relative to their SaaS platform investment.
- **High-Concurrency Stakeholder Diplomacy & Retail Operations:** My extensive background navigating high-volume, public-facing operations proves my ability to de-escalate complex issues under pressure. Whether managing real-time resource routing across concurrent high-demand environments or serving as an elected 1199SEIU Union Delegate representing over 300 personnel, I have spent my career partnering directly with C-suite executives to navigate high-stakes grievances and align workplace policies with rigid compliance frameworks. I excel at translating complex data limitations into clear business value and actionable training narratives for stakeholders at every tier, from frontline store managers handling loss prevention to internal senior leadership.
- **Scale & Project Ownership:** Throughout a nine-year tenure as an operational lead, I managed end-to-end business operations and vendor logistics, dynamically scaling cross-functional teams from a two-person nucleus up to 100+ personnel while uncovering organic growth pathways to expand revenue streams.

I thrive in fast-paced, autonomous environments that demand deep analytical curiosity and a community-first mentality. I welcome the opportunity to discuss how my technical translation toolkit, operational maturity, and pattern-analysis background can protect, retain, and expand Everseen's vision AI deployments. Thank you for your time, consideration, and dedication to raising the bar in retail innovation.

Best regards,

Preston Carey Leslie
