Dear Members of the Selection Committee,

I am writing to express my enthusiastic interest in the Temporary Senior Management Analyst position supporting the Administrative Director for Parks & Community Services. I am currently executing a self-funded, permanent relocation to the Pacific Northwest and am completely free of local commitments, allowing me to establish immediate regional housing, transportation, and onboarding availability to hit the ground running for any critical operational sprint. My professional focus centers on serving as a highly autonomous operations and systems "Bone-Setter" who transforms complex organizational friction into clean, sustainable public outcomes.

Per your directive to outline how my background fulfills the minimum qualifications, I bring an elite combination of advanced education and highly responsible analytical experience. I hold a Master of Science in Quantitative Methods and Modeling from Baruch College's Zicklin School of Business, fulfilling your preference for an advanced degree capable of synthesizing complex policy and financial data. This academic foundation is backed by over five years of intensive operations management, data fidelity auditing, and cross-functional stakeholder navigation within a highly regulated, multi-million-dollar community health ecosystem.

My operational baseline aligns directly with the core challenges facing the Parks & Community Services administration:

- **Technology Optimization & Data Analysis:** During an enterprise-wide platform migration for an 18,000-patient ecosystem, I audited frontline data baselines and resolved 10–20 high-friction systemic configuration anomalies daily. Commended by supervisory and patient experience leadership for my ability to translate chaotic frontline friction and behavioral incident data into highly objective, fact-driven requirements for our HIT and database teams, strictly isolating personal bias and mapping data uncertainty to protect system integrity. I understand how to evaluate and optimize departmental software applications to enhance reporting visibility and protect operational data.
- **Contract Governance & Fiscal Stewardship:** Across my professional career, I have negotiated scopes of service, managed vendor logistics, and audited compliance benchmarks. I know how to evaluate quantitative information to ensure localized revenue streams and public expenditures remain 100% accurate and mission-aligned.
- **High-Profile Stakeholder Communication & Labor Fluency:** As an elected 1199SEIU Union Delegate representing over 300 personnel, I navigated complex contract negotiations and dispute resolutions directly with executive leadership. I possess the emotional intelligence, level-headed composure, and structural awareness required to represent the City on regional workgroups, collaborate with labor organizations, and communicate complex policy issues clearly to elected officials and public audiences.

I am a service leader who believes that public spaces and community programming require rigorous, backend operational stability to thrive. I welcome the opportunity to discuss how my quantitative toolkit, labor fluency, and execution speed can immediately unblock your department's high-priority initiatives. Thank you for your time, leadership, and time-sensitive review.

Best regards,

Preston Carey Leslie
