

Mission

Highly analytical and solutions-driven Data Operations Professional targeting the Associate Data & ML Operations Engineer track. Combines an MS background in quantitative modeling and advanced analytics with a 15-year foundation in high-concurrency operational excellence. Proven capability to independently troubleshoot issues, manage complex data engineering workflows, and deliver technical guidance under pressure to ensure timely resolution of platform incidents.

Education

Master of Science in Quantitative Methods and Modeling

Barnab College, Zicklin School of Business, New York, NY

GPA:
3.525

Relevant Coursework Highlights:

Data Warehousing and Analytics | Simulation Modeling & Analysis | Modern Regression Analysis |
Corporate Finance | Investment Analysis | Data Visualization | Data Mining for Business Analytics |
Principles of Database Management | Programming for Analytics.

Bachelor of Arts in French, minor in Art History

Francis Marion University, Florence, SC

GPA:
3.633

Technical Skills

Cloud Technologies & Environments: Cloud Infrastructure Frameworks, Google Cloud Platform (GCP Ecosystem), Amazon Web Services (AWS Architecture), Environment Migration Support

Data Engineering & Extraction (ETL/ELT): Pipeline Engineering, Cloud Data Warehousing (BigQuery), Relational Database Design (3NF), Kimball Dimensional Modeling, SQL Querying (PostgreSQL, Databricks SQL), Python Data Wrangling, REST API Integration Logic

Operations & Infrastructure Triage: SLA Compliance Monitoring, Root Cause Analysis, Runbook & Playbook Development, GitHub Version Control, Workflow Automation, Technical Documentation Governance

Professional Experience

Lead Patient Care Associate (Implementation Consultant) | Callen-Lorde | April 2021 – March 2026

- **Environment Migration & Data Quality Auditing:** Navigated NextGen and Epic EMR front-end user platforms for an 18,000-patient ecosystem during an intensive enterprise-wide system transition; audited data entry baselines, conducted data engineering quality checks, and systematically identified anomalies to troubleshoot issues before delivering technical specs to database engineering teams.
- **Incident Management & SLA Scaling:** Deployed strong problem-solving skills to troubleshoot systemic configuration anomalies daily; engineered tracking pipelines to capture capacity telemetry. Conducted root cause analysis with high attention to detail to isolate an unflagged 99-voicemail hardware ceiling; scaled a new pilot division to guarantee the timely resolution of configuration failures and protect system SLA metrics.
- **Workflow Optimization & Systems Consultation:** Optimized complex behavioral health triage workflows, leveraging system navigation expertise to reduce average issue resolution times by 50% (from 40 to 20 minutes). Heavily consulted by management as the Behavioral Health Lead to provide the structural requirements and technical insights needed for platform playbooks and system runbooks, streamlining task turnaround times from a one-week bottleneck down to a clean 48-hour lifecycle.
- **Labor Governance & Stakeholder Dialogue:** Elected 1199SEIU Union Delegate representing 300+ personnel within a high-concurrency collective bargaining environment. Partnered directly with senior management and executive leadership to interpret collective bargaining agreements, resolve workplace grievances, and maintain operational stability.

Event Coordinator, F&B Reservation Agent, and Server | The Standard Hotel & ABCV | December 2010 – January 2020

- **Front-of-House Customer Coordination:** Coordinated customer seating logic, event contract coordination, and client preferences across 7 high-volume NYC venues using SevenRooms and Tripleseat front-end interfaces; verified user selections for automated notification preferences to maintain data accuracy for 300+ daily guest profiles.
- **High-Concurrency Service Execution (ABCV):** Maintained complete ownership of breakfast service for 11 concurrent tables (22–44 patrons) simultaneously during peak demand; applied rapid resource prioritizing, critical thinking, and collaborative teamwork to deliver exceptional service under intense pressure.

Senior Program & Account Lead | Del Monsoon | March 2021 – June 2026

- **Business Operations & Project Delivery:** Served as primary point of accountability for end-to-end execution, managing complex dependencies, performing ad-hoc data analysis, and scaling teams to 100+ personnel.
- **Fiscal Stewardship & Procurement:** Managed project spend, invoicing, and vendor logistics, identifying organic growth opportunities that generated \$60K+ in new-business streams.
- **Strategic Partnerships & Presentations:** Mobilized regional community coalitions and public-sector advocacy networks to build strategic partnerships; designed and delivered executive-level presentations and data-driven reports to influence stakeholders and scale organizational program impact.

Technical Portfolio & Active Architecture

PEX Project (Operational Evaluation: Statistical NLP Pipeline) | 2026

- **Data Operations & Machine Learning Workflows:** Collaborating with leadership to scope repeatable, automated text analytics pipelines; architecting unsupervised machine learning workflows utilizing statistical natural language processing (NLP) to cluster high-volume, unstructured feedback while implementing schema standards to ensure robust disaster recovery and system stability.
- **Workflow Mapping:** Designing a programmatic pipeline concept utilizing TF-IDF feature extraction and unsupervised KMeans clustering to group unstructured free-text survey feedback into interpretable service themes.

WHO Project (System Architecture & Workflow Evaluation: Healthcare Access Routing Engine) | 2026

- **Infrastructure Optimization & Platform Scoping:** Evaluating traditional analytical database constraints against front-line user latency requirements; mapping a successful pivot to a serverless AWS OLTP infrastructure model (AWS S3, Lambda, JavaScript) to optimize real-time performance and application stability.
- **REST API Data Prototyping & Staging:** Designing a local Python data bus concept aligned with modern software development processes to clean and interpret data from complex REST APIs for future integration testing across staging environments
- **Pipeline Validation & Quality Assurance:** Partnering directly with clinical teams to validate system logic and problem statements, ensuring the proposed automated data routing models eliminate systemic process friction and run consistently.

Quantitative Methods & Academic Projects

CIP Project (Geospatial Advocacy & Predictive Modeling) | 2026

- **Data Engineering & Automated Pipelines:** Engineered automated Python extraction and ingestion applications deployed on Google Cloud Run to systematically stream high-volume municipal datasets via the Socrata API directly into a cloud data warehouse.
- **Dynamic Schema Validation:** Implemented custom data normalization routines, multi-field deduplication (QUALIFY ROW_NUMBER()), and automated schema mutation logic to handle streaming JSON variables without breaking downstream tables.
- **Data Engineering & Dimensional Modeling:** Developed a dbt transformation architecture managed via the dbt Cloud platform to compile disparate raw datasets into a unified Kimball star schema with conformed shared dimensions and multi-fact table tracking.

SDOH Project (Epidemiological & Social Determinants of Health Analytics Engine) | 2026

- **Multi-Layer Data Integration:** Engineered an analytical script to clean, merge, and evaluate multi-sheet municipal public health data matrices (Prevalence, Care Linkage, Viral Suppression) alongside Social Determinants of Health (SDOH) indicators across 141 conformed ZIP code zones.
- **Statistical Stability Auditing:** Programmed data-cleaning logic to isolate and map privacy-suppressed negative integers to null spaces, executing programmatic diagnostic sweeps across 10 distinct rate-stability vectors to evaluate data degradation and historical reporting risks.
- **Geographic Variance Profiling:** Executed comprehensive multi-variable correlation matrices and Poisson regression modeling with exact p-value mapping and Z-score spread models to rank descriptive geographic and demographic variations across high-risk intersectional sub-populations.

Additional Skills & Certifications

Alteryx Designer Core Certification
Alteryx
Certified TESLA Instructor (Providing Training, Instructional Design, and Adult Education)
Literacy Assistance Center Academy, New York, NY
Certified DELF A1/A2
Université de Caen Basse-Normandie, Caen, France
Certified COVID-19 Contact Tracer
Johns Hopkins University, Coursera.org

Community Leadership

Co-Founder & Event Producer | Queer Roots Cinema | 2021–Present

Co-founded and lead end-to-end production for a 30-member intergenerational community program, facilitating inclusive discussion and event logic.

Self-Care Methods

Continual academic pursuit; training in contemporary dance; tabletop RPG game mastery (collaborative storytelling)
