Mission

Highly analytical and value-driven Systems Analyst specializing in data operations, cross-organization functional coordination, and institutional process optimization as a Global Systems Associate. Combines a Master of Science background in quantitative methods and advanced data manipulation with 15 years of veteran maturity in high-concurrency operational environments. Proven capability interpreting complex data systems to isolate operational risks, build automated reporting workflows, and transform frontline administrative friction into consistent, documented process playbooks and scalable training frameworks.

Education

Master of Science in Quantitative Methods and Modeling

Baruch College, Zicklin School of Business, New York, NY

GPA:
3.525

Relevant Coursework Highlights:

Data Warehousing and Analytics | Simulation Modeling & Analysis | Modern Regression Analysis |
Corporate Finance | Investment Analysis | Data Visualization | Data Mining for Business Analytics |
Principles of Database Management | Programming for Analytics.

Bachelor of Arts in French, minor in Art History
Francis Marion University, Florence, SC

GPA:
3.633

Technical Skills

Data Systems & Analytics: Microsoft Office (Advanced Excel & Power Queries), Data Visualization, SQL Data Querying (PostgreSQL), Python Data Wrangling, Descriptive Statistical Modeling, Alteryx

Pipeline & Systems Automation: Automated Ingestion Frameworks (REST APIs), Cloud-Based Data Warehousing (Google Cloud Run), dbt Transformation Architecture, Systems Architecture Mapping, User Permissions & Access Control

Constituent Alignment & Triage: Multi-Layer Environment Crisis Management, Strong written communication skills, Inter-Organizational Communications, Training & Instructional Design, Remote/Hybrid Meeting Facilitation

Professional Experience

Lead Patient Care Associate (Implementation Consultant) | Callen-Lorde | April 2021 – March 2026

- **Systems Transition & Data Governance:** Navigated core architecture for an 18,000-user ecosystem during an intensive enterprise software migration (NextGen to Epic); audited system logic, verified source-to-destination field mapping, and managed database data quality to preserve vital demographic layers and ensure compliance.
- **Workflow Optimization & Risk Management:** Deployed data-driven problem-solving to isolate configuration errors and administrative processing latency under pressure; conducted root cause analysis to trace data degradation vectors, preserving institutional integrity across distinct user-access environments.
- **Cross-Functional Documentation & Training:** Collaborated directly with clinical operations teams to translate complex system updates into structured requirements; designed, authored, and rolled out localized process runbooks and frontline verification playbooks that flattened administrative backlogs and reduced query latency by 50%.
- **Labor Governance & Union Dialogue:** Elected 1199SEIU Union Delegate representing 300+ personnel within a complex collective bargaining environment. Partnered directly with executive administrative leadership to interpret labor agreements, resolve systemic workplace grievances, and maintain operational stability across the institution.

Event Coordinator, F&B Reservation Agent, and Server | The Standard Hotels & ABCV | March 2015 – May 2021

- **Account Management & Customer Coordination (The Standard Hotels):** Coordinated high-value customer relationships, event contracts, and client preferences across 7 venues using SevenRooms and Tripleseat; managed customer calls and verified selections to maintain data accuracy for 300+ daily profiles.
- **High-Concurrency Service Execution (ABCV):** Managed high-volume hospitality operations for up to 44 concurrent patrons simultaneously under intense, peak-demand pressure.

Senior Program Operations Lead | Del Monsoon | December 2010 – January 2020

- **Operational Capacity & Strategic Tracking:** Served as primary point of accountability for end-to-end project execution, managing complex operational dependencies, executing ad-hoc data reporting, and scaling teams to 100+ personnel across decentralized environments.
- **Fiscal Stewardship & Resource Logistics:** Managed project spend, invoicing, contract metrics, and vendor logistics, identifying process efficiencies that protected project budgets and optimized resource distribution.
- **Stakeholder Communications & Reporting:** Mobilized regional multi-stakeholder coalitions using strong prioritization skills; deployed advanced written and verbal communication to present data-driven reports and operational status briefings to executive leadership.

Technical Portfolio & Active Architecture

PEX Project (Operational Evaluation: Statistical NLP Pipeline) | 2026

- **Retention & Experiments Modeling:** Collaborating with leadership to engineer an automated text-analytics pipeline; architecting unsupervised machine learning workflows utilizing NLP to cluster feedback data, conducting optimization experiments to expose churn risks.
- **Workflow Mapping:** Designing a programmatic pipeline concept utilizing TF-IDF feature extraction and unsupervised KMeans clustering to group unstructured free-text survey feedback into interpretable service themes.

WHO Project (System Architecture & Workflow Evaluation: Healthcare Access Routing Engine) | 2026

- **Product-Fluent Infrastructure Scoping:** Evaluating legacy application data architecture constraints against user interaction latency requirements; mapping a successful pivot to a serverless AWS infrastructure framework (Lambda, S3) to support automated data routing and real-time query optimization.
- **REST API Data Prototyping & Staging:** Designing a local Python data bus concept aligned with modern software development processes to clean and interpret data from complex REST APIs for future integration testing across staging environments
- **Pipeline Validation & Quality Assurance:** Partnering directly with clinical teams to validate system logic and problem statements, ensuring the proposed automated data routing models eliminate systemic process friction and run consistently.

Quantitative Methods & Academic Projects

CIP Project (Geospatial Advocacy & Predictive Modeling) | 2026

- **Data Engineering & Automated Pipelines:** Engineered automated data ingestion frameworks to stream high-volume municipal datasets via REST APIs directly into data warehouses for strategic reporting.
- **Dynamic Schema Validation:** Implemented custom data normalization routines, multi-field deduplication (QUALIFY ROW_NUMBER()), and automated schema mutation logic to handle streaming JSON variables without breaking downstream tables.
- **Data Engineering & Dimensional Modeling:** Developed a dbt transformation architecture managed via the dbt Cloud platform to compile disparate raw datasets into a unified Kimball star schema with conformed shared dimensions and multi-fact table tracking.

SDOH Project (Epidemiological & Social Determinants of Health Analytics Engine) | 2026

- **Multi-Layer Data Integration:** Engineered an analytical script to clean, merge, and evaluate multi-sheet municipal public health data matrices (Prevalence, Care Linkage, Viral Suppression) alongside Social Determinants of Health (SDOH) indicators across 141 conformed ZIP code zones.
- **Statistical Stability Auditing:** Programmed data-cleaning logic to isolate and map privacy-suppressed negative integers to null spaces, executing programmatic diagnostic sweeps across 10 distinct rate-stability vectors to evaluate data degradation and historical reporting risks.
- **Geographic Variance Profiling:** Executed comprehensive multi-variable correlation matrices and Poisson regression modeling with exact p-value mapping and Z-score spread models to rank descriptive geographic and demographic variations across high-risk intersectional sub-populations.

Additional Skills & Certifications

Certified TESLA Instructor (Providing Training, Instructional Design, and Adult Education)

Literacy Assistance Center Academy, New York, NY

Certified DELF A1/A2

Université de Caen Basse-Normandie, Caen, France

Alteryx Designer Core Certification

Alteryx

Certified COVID-19 Contact Tracer

Johns Hopkins University, Coursera.org

Community Leadership

Co-Founder & Event Producer | Queer Roots Cinema | 2021–Present

Co-founded and lead end-to-end production for a 30-member intergenerational community program, facilitating inclusive discussion and event logic.

Self-Care Methods

Continual academic pursuit; training in contemporary dance; tabletop RPG game mastery (collaborative storytelling)
