843.694.6959
prestoncarey90.github.io/portfolio

Mission

Highly analytical and mission-driven Customer Solutions Engineer with a dedicated focus on quality and sustainable practices across data operations. Combines an MS background in quantitative modeling with 15 years of veteran maturity running high-concurrency stakeholder environments. Proven capability using strong analytical skills to interpret complex datasets, isolate operational anomalies, integrate platform features, calculate custom KPIs, and transform end-user system friction into clear, documented playbooks and scalable adoption frameworks.

Education

Master of Science in Quantitative Methods and Modeling

Baruch College, Zicklin School of Business, New York, NY

GPA:
3.525

Relevant Coursework Highlights:

Data Warehousing and Analytics | Simulation Modeling & Analysis | Modern Regression Analysis |
Corporate Finance | Investment Analysis | Data Visualization | Data Mining for Business Analytics |
Principles of Database Management | Programming for Analytics.

Bachelor of Arts in French, minor in Art History

Francis Marion University, Florence, SC

GPA:
3.633

Technical Skills

SaaS Deployment & Quantitative Analytics: SQL Data Querying (PostgreSQL, Databricks SQL), Python Data Wrangling, Advanced Microsoft Excel (Power Queries), Custom KPI Formulation, Data Quality Auditing, Multi-Layer Data Integration, Alteryx

Systems Integration & Pipelines: Automated Ingestion Frameworks (REST APIs), Cloud Data Warehousing (GCP), dbt Transformation Architecture, Systems Architecture Mapping, Agile Development (Scrum / Sprint Team Lifecycles), System Access & Workflow Permissions

Client Enablement & Business Management: Multi-Layer Environment Crisis Management, Strong written communication skills, Customer Interaction, Inter-Organizational Coordination, Training & Workshop Facilitation, Focus on Quality, Customer Needs Mapping

Professional Experience

Lead Patient Care Associate (Implementation Consultant) | Callen-Lorde | April 2021 – March 2026

- **Frontline System Auditing & User Transition:** Navigated the OCHIN Epic platform for an 18,000-patient ecosystem during an intensive migration; audited front-desk inputs manually and performed quality checks to align with unique customer needs and preserve underlying data quality.
- **Operational Troubleshooting & Escalation:** Deployed strong problem-solving skills to navigate systemic configuration anomalies daily; engineered a manual tracking system in Google Sheets to capture capacity telemetry and monitor service levels under pressure. Isolated an unflagged 99-voicemail hardware capacity restriction causing automated routing failures, providing the empirical proof needed for executive leadership to launch an entirely new pilot call center.
- **Frontline Enablement & Workflow Consulting:** Appointed to lead onboarding and workflow training for incoming team leads and staff assigned to the new pilot call center division; heavily consulted by management to provide frontline operational requirements and user logic for localized process playbooks and system runbooks, successfully flattening task backlogs.
- **Labor Governance & Stakeholder Dialogue:** Elected 1199SEIU Union Delegate representing 300+ personnel within a complex collective bargaining environment. Partnered directly with senior management and executive leadership to interpret agreements, resolve workplace grievances, and maintain institutional operational stability under rigid frameworks.

Event Coordinator, F&B Reservation Agent, and Server | The Standard Hotels & ABCV | March 2015 – May 2021

- **Account Management & Customer Coordination (The Standard Hotels):** Coordinated customer relationships, event contracts, and preferences across 7 venues using SevenRooms and Tripleseat; verified selections to maintain data accuracy for 300+ daily profiles.
- **High-Concurrency Service Execution (ABCV):** Managed high-volume hospitality operations for up to 44 concurrent patrons simultaneously under intense, peak-demand pressure.

Senior Program Operations Lead | Del Monsoon | December 2010 – January 2020

- **Operational Capacity & Strategic Tracking:** Served as primary point of accountability for end-to-end project execution, managing complex operational dependencies, executing ad-hoc data reporting, and scaling teams to 100+ personnel across decentralized environments.
- **Project Management & Performance Tracking:** Managed customer roadmaps, project budgets, invoicing, and vendor performance metrics within an agile business management framework; identified process efficiencies with a strict focus on quality to ensure delivery milestones were met.
- **Stakeholder Communications & Reporting:** Mobilized regional multi-stakeholder coalitions using strong prioritization skills; deployed advanced written and verbal communication to present data-driven reports and operational status briefings to executive leadership.

Technical Portfolio & Active Architecture

PEX Project (Operational Evaluation: Statistical NLP Pipeline) | 2026

- **Retention & Experiments Modeling:** Collaborating with leadership to engineer an automated text-analytics pipeline; architecting unsupervised machine learning workflows utilizing NLP to cluster feedback data, conducting optimization experiments to expose churn risks.
- **Workflow Mapping:** Designing a programmatic pipeline concept utilizing TF-IDF feature extraction and unsupervised KMeans clustering to group unstructured free-text survey feedback into interpretable service themes.

WHO Project (System Architecture & Workflow Evaluation: Healthcare Access Routing Engine) | 2026

- **Product-Fluent Infrastructure Scoping:** Evaluating legacy application data architecture constraints against user interaction latency requirements; mapping a successful pivot to a serverless AWS infrastructure framework (Lambda, S3) to support automated data routing and real-time query optimization.
- **REST API Data Prototyping & Staging:** Designing a local Python data bus concept aligned with modern software development processes to clean and interpret data from complex REST APIs for future integration testing across staging environments
- **Pipeline Validation & Quality Assurance:** Partnering directly with clinical teams to validate system logic and problem statements, ensuring the proposed automated data routing models eliminate systemic process friction and run consistently.

Quantitative Methods & Academic Projects

CIP Project (Geospatial Advocacy & Predictive Modeling) | 2026

- **Automated Pipeline Engineering:** Engineered automated data ingestion frameworks to stream high-volume datasets via REST APIs directly into centralized cloud data warehouses, optimizing data workflows to support strategic operational tracking.
- **Dynamic Schema Validation:** Implemented custom data normalization routines, multi-field deduplication (QUALIFY ROW_NUMBER()), and automated schema mutation logic to handle streaming JSON variables without breaking downstream tables.
- **Data Engineering & Dimensional Modeling:** Developed a dbt transformation architecture managed via the dbt Cloud platform to compile disparate raw datasets into a unified Kimball star schema with conformed shared dimensions and multi-fact table tracking.

SDOH Project (Epidemiological & Social Determinants of Health Analytics Engine) | 2026

- **Technical Leadership & Poisson Predictive Modeling:** Acted as Technical Lead supervising code integration across multi-department project phases; engineered data cleaning pipelines to isolate invalid flags and developed an offset Poisson regression model to analyze health outcomes across 141 conformed NYC ZIP codes.
- **Statistical Stability Auditing:** Programmed data-cleaning logic to isolate and map privacy-suppressed negative integers to null spaces, executing programmatic diagnostic sweeps across 10 distinct rate-stability vectors to evaluate data degradation and historical reporting risks.
- **Geographic Variance Profiling:** Executed comprehensive multi-variable correlation matrices and Poisson regression modeling with exact p-value mapping and Z-score spread models to rank descriptive geographic and demographic variations across high-risk intersectional sub-populations.

Additional Skills & Certifications

Certified TESLA Instructor (Providing Training, Instructional Design, and Adult Education)

Literacy Assistance Center Academy, New York, NY

Certified DELF A1/A2

Université de Caen Basse-Normandie, Caen, France

Alteryx Designer Core Certification

Alteryx

Certified COVID-19 Contact Tracer

Johns Hopkins University, Coursera.org

Community Leadership

Co-Founder & Event Producer | Queer Roots Cinema | 2021–Present

Co-founded and lead end-to-end production for a 30-member intergenerational community program, facilitating inclusive discussion and event logic.

Self-Care Methods

Continual academic pursuit; training in contemporary dance; tabletop RPG game mastery (collaborative storytelling)
