

Mission

Analytical and solutions-driven Customer Success professional with a Master of Science in Quantitative Methods and Modeling and deep experience maximizing customer satisfaction within enterprise environments. Demonstrates strong business acumen and a track record of driving operational excellence during complex digital transformation initiatives. Combines advanced technical knowledge with elite communication and collaboration skills to translate system architecture into business value, coordinate cross-functional resources, and execute strategic account management.

Education

Master of Science in Quantitative Methods and Modeling

Baruch College, Zicklin School of Business, New York, NY

GPA:

3.525

Relevant Coursework Highlights:

Data Warehousing and Analytics | Simulation Modeling & Analysis | Modern Regression Analysis |
Corporate Finance | Investment Analysis | Data Visualization | Data Mining for Business Analytics |
Principles of Database Management | Programming for Analytics.

Bachelor of Arts in French, minor in Art History

Francis Marion University, Florence, SC

GPA:

3.633

Technical Skills

Programming & Scripting: SQL (Databricks SQL, PostgreSQL), Python (Data Mining, Data Wrangling, ELT), R (Regression Modeling, ANOVA), Regular Expressions (Regex text extraction), API Logic, Schema Mapping

Data Environments & Governance: Electronic Health Records (Epic, NextGen), Real World Data (RWD) Management, Data Governance (HIPAA/PHI Protection)

Enterprise Customer Success & Account Management: Strategic Account Management, Customer Success Architecture, Customer Retention, Product Adoption Strategies, Customer Engagement, Cross-functional Collaboration

Data Literacy & Security Management: Technical Workflow Auditing, HIPAA Data Privacy, Access Management Testing, Security Management Logic, Trend Analysis, SQL Dataset Profiling

SaaS Platforms & Environment Tools: Git/GitHub, Enterprise EHR (Epic, NextGen), Hospitality CRM (SevenRooms, Tripleseat), Advanced LLM Prompt Engineering, Agentic Workflows

Professional Experience

Lead Patient Care Associate (Implementation Consultant) | Callen-Lorde | 2021–2026

- **Enterprise Software & Digital Transformation:** Audited operational baselines and frontline data quality during an enterprise-wide digital transformation via an Epic EMR platform migration for an 18,000-patient ecosystem; translated clinical friction into strategic technical documentation and content development to ensure long-term value realization, business value, and smooth product adoption.

Operational Efficiency: Improved resolution speed for complex patient-provider data conflicts by over 50%, leveraging expert system navigation to reduce average handling time from 45 to 20 minutes.

Systemic Triage & Troubleshooting: Resolved 10–20 high-friction daily configuration and user conflicts rooted in systemic institutional infrastructure failures; engineered an ad-hoc tracking pipeline in Google Sheets to capture capacity telemetry, successfully isolating an unflagged telephonic routing failure and reducing triage times by 50%.

Access Management & Security Governance: Conducted rigorous compliance audits of user provisioning, access management, and permissions logic during a major system transformation; served as a primary driver for cross-functional collaboration to synchronize milestones across IT, Administrative, and Clinical teams, eliminating service delivery gaps and driving process improvement.

Event Coordinator, F&B Reservation Agent, and Server | The Standard Hotel & ABCV | 2015-2021

- **Strategic Engagement & Account Strategy:** Independently orchestrated high-volume operational data, strategic engagement protocols, and account strategy coordinates for 7 NYC-based venues across 2 flagship hotels utilizing SevenRooms and Tripleseat.

Validated Enterprise Database Integrity: Safeguarded high-fidelity record validation within a shared global CRM database, ensuring local data accuracy and strategic relationship retention for 300+ daily guest interactions.

Account Management & Customer Retention: Facilitated localized event contracts and procurement; implemented proactive client health-checks to identify cross-sell opportunities, guarantee customer satisfaction, and secure 100% customer retention.

Spearheaded High-Concurrency Performance (ABCV): Ownership of breakfast service for 11 concurrent tables (22–44 patrons) during peak demand; applied real-time resource routing and cross-functional teamwork to maintain service excellence in a high-stress environment.

Senior Program & Account Lead | Del Monsoon | 2010–2019

- **Business Operations & Project Delivery:** Served as primary point of accountability for end-to-end execution, managing complex dependencies, performing ad-hoc data analysis, and scaling teams to 100+ personnel.
- **Fiscal Stewardship & Procurement:** Managed project spend, invoicing, and vendor logistics, identifying organic growth opportunities that generated \$60K+ in new-business streams.
- **Strategic Partnerships & Presentations:** Mobilized regional community coalitions and public-sector advocacy networks to build strategic partnerships; designed and delivered executive-level presentations and data-driven reports to influence stakeholders and scale organizational program impact.

Technical Portfolio & Active Architecture

PEX Project (Operational Evaluation: Statistical NLP Pipeline) | 2026

- **Methodological Design:** Scoping an automated, repeatable Statistical NLP workflow utilizing Python, TF-IDF feature extraction, and KMeans clustering to evaluate high-volume, unstructured stakeholder survey data.
- **Reproducible Analytics:** Establishing fixed mathematical parameters to dynamically categorize qualitative feedback into actionable operational insights, replacing manual data tallying with highly scalable, reproducible text analytics.

WHO Project (System Architecture & Workflow Evaluation: Healthcare Access Routing Engine) | 2026

- **Technical Scoping & Optimization:** Evaluated initial data warehouse architecture against front-line stakeholder latency needs, successfully pivoting the project scope to a serverless AWS (S3/Lambda) model to optimize real-time application performance.
- **Implementation & Pipeline Engineering:** Architecting a Python-based data bus to ingest, process, and normalize disparate API endpoints; executed advanced data mapping, schema validation testing, and data profiling to combine geospatial and temporal metrics.
- **Operational Validation:** Partnering directly with clinical teams to validate assumptions and problem statements, ensuring the proposed automation logic accurately mitigates systemic barriers in behavioral health referrals.

Quantitative Methods & Academic Projects

CIP Project (Geospatial Advocacy & Predictive Modeling) | 2026

- **Serverless ELT Architecture:** Engineered automated Python ingestion applications deployed on Google Cloud Run to stream high-volume municipal datasets via the Socrata API directly into Google BigQuery.
- **Dynamic Schema Validation:** Implemented custom data normalization routines, multi-field deduplication (QUALIFY ROW_NUMBER()), and automated schema mutation logic to handle streaming JSON variables without breaking downstream tables.
- **Kimball Dimensional Modeling:** Developed a dbt transformation architecture compiling disparate raw datasets into a unified star schema with conformed shared dimensions (dim_shared_date, dim_shared_geography) and multi-fact table tracking.

SDOH Project (Epidemiological & Social Determinants of Health Analytics Engine) | 2026

- **Multi-Layer Data Integration:** Engineered an analytical script to clean, merge, and evaluate multi-sheet municipal public health data matrices (Prevalence, Care Linkage, Viral Suppression) alongside Social Determinants of Health (SDOH) indicators across 141 conformed ZIP code zones.
- **Statistical Stability Auditing:** Programmed data-cleaning logic to isolate and map privacy-suppressed negative integers to null spaces, executing programmatic diagnostic sweeps across 10 distinct rate-stability vectors to evaluate data degradation and historical reporting risks.
- **Geographic Variance Profiling:** Executed comprehensive multi-variable correlation matrices and Poisson regression modeling with exact p-value mapping and Z-score spread models to rank descriptive geographic and demographic variations across high-risk intersectional sub-populations.

Additional Skills & Certifications

Alteryx Designer Core Certification

Alteryx

Certified TESLA Instructor (Providing Training, Instructional Design, and Adult Education)

Literacy Assistance Center Academy, New York, NY

Certified DELF A1/A2

Université de Caen Basse-Normandie, Caen, France

Certified COVID-19 Contact Tracer

Johns Hopkins University, Coursera.org

Community Leadership

Co-Founder & Event Producer | Queer Roots Cinema | 2021–Present

Co-founded and lead end-to-end production for a 30-member intergenerational community program, facilitating inclusive discussion and event logic.

Self-Care Methods

Continual academic pursuit; training in contemporary dance; tabletop RPG game mastery (collaborative storytelling)
