

Professional Summary

Mission-driven Senior Executive Assistant, Executive Operations Partner, and Systems Translator with 15 years of leadership experience diagnosing complex organizational workflows, managing multi-stakeholder static, and optimizing large-scale public service data systems. Combines a rigorous Master of Science in Quantitative Methods with a human-centered approach to process design, utilizing an analytical scalpel to eliminate administrative friction, protect database integrity, and accelerate complex project delivery pipelines.

Core Competencies

Executive Operations & Governance

- Complex Calendar Management
- Executive Briefings
- Administrative Duties
- Confidentiality & Sensitive Information Management
- Pre-Public Document Critiquing
- Operational Planning
- Sound Judgment & Professionalism
- Root-Cause Diagnosis
- SLA Compliance

Project Delivery & Fiscal Stewardship

- Project Delivery
- Public Administration
- Business Administration
- Cross-Functional Liaison & Context Routing
- Interpersonal Communication Skills
- Contract Validation
- Multi-Stakeholder Mobilization
- Vendor Logistics
- Labor & Union Governance (300+ Personnel)

Quantitative Data & Systems Management

- Microsoft Office Suite (Advanced Excel, OneNote)
- Analytical Skills
- Structural Data Curation
- Managing Administrative Distribution Lists
- Database Design
- SQL, Python, dbt
- Cloud Data Warehousing
- Data Quality Auditing
- Data Visualization & Dashboards (Tableau, Plotly)

Professional Experience

Lead Patient Care Associate (Implementation Consultant) | Callen-Lorde | April 2021 – March 2026

- **Enterprise System Migration & Data Auditing:** Navigated core architecture for an 18,000-user ecosystem during an intensive enterprise software transition; audited source-to-destination field mapping and managed database data quality to preserve critical demographic layers.
- **Incident Management & Operational Telemetry:** Engineered a manual tracking system to capture capacity telemetry and monitor processing bottlenecks; conducted root-cause analysis that isolated unflagged system-level constraints, scaling a new pilot division to guarantee immediate resolution of data routing failures.
- **Workflow Optimization & Documentation:** Developed deep expertise in system navigation to reduce operational process latency by 50% (cutting processing time from 40 down to 20 minutes) through mastery of platform architecture and workflow logic to develop solutions for systemic friction; shared documentation and navigation strategies with cross-functional teams to accelerate broader adoption and inform formal process playbooks.
- **Cross-Functional Leadership & Labor Governance:** Heavily consulted by executive directors as the Behavioral Health subject-matter expert to translate daily operational friction into structural requirements; elected 1199SEIU Union Delegate representing 300+ personnel, coordinating with Human Resources channels, and navigating complex contract metrics directly with leadership.

Server | ABCV | March 2019 – May 2021

- **Real-Time Resource Routing:** Managed floor workflows and real-time inventory dependencies for up to 11 concurrent tables during peak service demand, applying capacity planning and instant communication to preserve team performance under high-stress conditions.
- **Cross-Functional Optimization:** Promoted rapidly through the FOH pipeline based on a demonstrated ability to master complex menu logic, maintain a friendly and professional demeanor while navigating intense interpersonal dynamics, and bridge communications between back-of-house assets and frontline service workflows.

Food & Beverage Reservations & Operations Specialist | The Standard Hotels | May 2015 – October 2018

- **Multi-Venue Data Coordination:** Orchestrated high-volume operational data and customer logic across 7 high-concurrency venues using SevenRooms and Tripleseat platform architectures.
- **Database Record Integrity:** Maintained strict record validation and deduplication protocols within a shared global CRM database, securing local data accuracy across 300+ daily guest profile interactions.
- **Fiscal Stewardship & Contract Tracking:** Managed small-scale event procurement contracts and localized revenue streams, ensuring 100% accuracy in contract fulfillment, invoicing, and financial reconciliation.

Senior Program Operations Lead | Del Monsoon | December 2010 – December 2020

- **Project Execution & Team Mobilization:** Served as primary point of accountability for end-to-end project execution, coordinating complex operational dependencies and mobilizing teams of up to 100+ personnel across decentralized environments.
- **Fiscal Stewardship & Vendor Management:** Managed staff recruitment, localized project budgets, invoicing tracking, and vendor logistics;; supported a fundraising portfolio that generated \$60K+ in active revenue.
- **Coalition Building & Advocacy:** Mobilized regional community coalitions and public-sector advocacy networks to support organizational goals and promote civic visibility.

FREELANCE & INDEPENDENT WORK | October 2018 – December 2020

Personal Assistant & Project Manager | Independent Contractor

- **International Logistics & Travel Coordination:** Orchestrated international travel logistics, including visa processing and vaccination documentation, for clients traveling locally and abroad.
- **Cross-Cultural Regulatory Navigation:** Demonstrated the ability to work independently when researching, understanding, and filing complex US regulatory documentation and taxes for foreign clients.
- **Calendar Management & Project Coordination:** Managed personal and business calendars, coordinated communications between project teams, and facilitated event production.

Operational Systems & Analytical Projects

- *Complaints & Inspections (CIP) Project:* Operating with total autonomy as the lead systems architect, engineered an end-to-end ELT pipeline on Google Cloud Platform integrating high-volume NYC 311 requests and DOHMH records into a unified analytical data bus. Programmed Python extraction services on GCP Cloud Run to handle Socrata API pagination and automated schema validation; built staging and dimensional models in dbt using strict string-normalization and regular expressions to resolve spatial cross-agency identifiers and enforce data integrity into a Kimball star schema for executive Data Studio reporting.
- *Social Determinants of Health (SDOH) Project:* Served as Technical Lead directing the data preprocessing, geographic diagnostics, and statistical architecture evaluating multi-layer NYC epidemiological and socioeconomic matrices across 141 conformed ZIP codes. Independently piloted an offset Poisson generalized linear model (GLM) with a 2020 Census population log-offset; engineered an institutional control dummy

variable to unmask a massive geographical outlier at the Rikers Island correctional facility, driving model deviance down from 27,695 to a highly stable 3,644. Calibrated a 4-cluster unsupervised K-Means segmentation model to identify resource allocation targets, verifying mathematical boundaries via Hierarchical Agglomerative Clustering with Ward Linkage.

- *Patient Experience (PEX) Project*: Collaborating directly with Patient Experience leadership to design a statistical NLP and data mining pipeline architecture that transforms high-volume, unstructured survey feedback into actionable service themes. Defining architectural requirements for an automated Python workflow utilizing regex normalization, lemmatization data-cleaning arrays, and TF-IDF vectorization; modeling a reproducible KMeans clustering framework to eliminate manual keyword searching and empower stakeholders to make data-supported operational decisions.
- *WHO Project (Healthcare Access System Architecture)*: Conceived and currently architecting a serverless decision-support routing application framework designed to eliminate behavioral health referral friction for frontline clinical triage teams. Successfully pivoted the initial project scope from a traditional OLAP Data Warehouse to a lightweight, serverless OLTP model utilizing AWS S3 and Lambda to optimize for real-time, low-latency lookups without requiring consistent database ingestion tables. Designing a Python-driven data bus to flatten relational provider networks and MTA transit APIs into a denormalized JSON dataset, while incorporating dynamic UI Smart-Links to maintain zero backend compute costs and strict health privacy governance.

Education

Master of Science, Quantitative Methods and Modeling

GPA:

Baruch College, Zicklin School of Business, New York, NY

3.525

Relevant Coursework:

Data Warehousing & Analytics | Simulation Modeling & Analysis | Modern Regression Analysis | Data Visualization |
Data Mining for Business Analytics | Principles of Database Management | Programming for Analytics

Bachelor of Arts, French (minor: Art History)

GPA:

Francis Marion University, Florence, SC

3.633

Graduated cum laude with University Honors | Dean's List (Fall 2008, Fall 2012) | President's List (Fall 2009, Spring 2011, Spring 2012) | LIFE Scholarship Recipient

Certifications & Community

Alteryx Designer Core Certified

Alteryx

Certified TESLA Instructor

(Literacy Assistance Center Academy) – Training, Instructional Design, Adult Education

Certified DELF A1/A2

Université de Caen Basse-Normandie

Certified COVID-19 Contact Tracer

Johns Hopkins University (Coursera)

Co-Founder & Event Producer, Queer Roots Cinema

30-member intergenerational community program; end-to-end production and inclusive event facilitation

Self-Care Methods

Continual academic pursuit; training in contemporary dance; tabletop RPG game mastery (collaborative storytelling)
