Mission

Customer-centric and highly analytical Customer Success professional specializing in enterprise digital transformation, cloud integrations, and data-driven value realization. Combines a strong technical aptitude and MS graduate background in quantitative modeling with a 15-year foundation in high-concurrency operational leadership. Proven capability delivering strategic business insights and technical guidance to help executive stakeholders confidently adopt complex software and practical AI features to drive team productivity and sales enablement.

Education

Master of Science in Quantitative Methods and Modeling

Baruch College, Zicklin School of Business, New York, NY

GPA:
3.525

Relevant Coursework Highlights:

Data Warehousing and Analytics | Simulation Modeling & Analysis | Modern Regression Analysis |
Corporate Finance | Investment Analysis | Data Visualization | Data Mining for Business Analytics |
Principles of Database Management | Programming for Analytics.

Bachelor of Arts in French, minor in Art History

Francis Marion University, Florence, SC

GPA:
3.633

Technical Skills

SaaS Integration & Technical Operations: System Integration & API Data Logic, REST APIs, Cloud Architectures (AWS, GCP), CRM Environment Integration, User Provisioning, Permissions Governance, SLA Monitoring & Adherence

Analytical Modeling & Systems Telemetry: Logging & Monitoring System Analytics (DataDog exposure, Performance Telemetry), SQL Querying (PostgreSQL, Databricks SQL), Python & R Data Wrangling, Regular Expressions (Regex), Runbook & Playbook Development

Client Success & Enterprise Strategy: Technical Guidance, Change Management, Digital Transformation, Business Insights Delivery, Sales Enablement, Requirements Elicitation, Team Onboarding & User Training

Professional Experience

Lead Patient Care Associate (Implementation Consultant) | Callen-Lorde | 2021–2026

- **Digital Transformation & Technical Guidance:** Navigated NextGen and Epic EMR front-end user platforms for an 18,000-patient ecosystem during an intensive enterprise-wide software transition; audited data entry baselines and synthesized user workflow friction to deliver clear technical guidance to IT support teams to accelerate platform adoption.
- **SLA Monitoring & Systems Telemetry:** Deployed strong problem-solving skills to troubleshoot systemic configuration anomalies daily; developed an ad-hoc tracking infrastructure to capture real-time capacity telemetry and monitor SLA adherence. Isolated a critical, undocumented 99-voicemail hardware capacity ceiling causing automated communication routing failures, delivering the empirical business insights required to launch a new pilot division and improve data resolution speeds by 50%.
- **Runbook Consultation & Operational Training:** Appointed to lead onboarding, performance guidance, and training for incoming team leads and staff within the new pilot call center division. Heavily consulted by non-union supervisor teams to provide the structural insights and technical requirements needed to design localized playbooks, system runbooks, and Standard Operating Procedures (SOPs).
- **Labor Governance & Stakeholder Dialogue:** Elected 1199SEIU Union Delegate representing 300+ personnel within a high-concurrency collective bargaining environment. Partnered directly with senior management and executive leadership to interpret collective bargaining agreements, resolve workplace grievances, and maintain operational stability.

Event Coordinator, F&B Reservation Agent, and Server | The Standard Hotel & ABCV | 2015-2021

- **Front-of-House Customer Coordination:** Coordinated customer seating logic, event contract coordination, and client preferences across 7 high-volume NYC venues using SevenRooms and Tripleseat front-end interfaces; verified user selections for automated notification preferences to maintain data accuracy for 300+ daily guest profiles.
- **High-Concurrency Service Execution (ABCV):** Maintained complete ownership of breakfast service for 11 concurrent tables (22–44 patrons) simultaneously during peak demand; applied rapid resource prioritizing, critical thinking, and collaborative teamwork to deliver exceptional service under intense pressure.

Senior Program & Account Lead | Del Monsoon | 2010–2019

- **Business Operations & Project Delivery:** Served as primary point of accountability for end-to-end execution, managing complex dependencies, performing ad-hoc data analysis, and scaling teams to 100+ personnel.
- **Fiscal Stewardship & Procurement:** Managed project spend, invoicing, and vendor logistics, identifying organic growth opportunities that generated \$60K+ in new-business streams.
- **Strategic Partnerships & Presentations:** Mobilized regional community coalitions and public-sector advocacy networks to build strategic partnerships; designed and delivered executive-level presentations and data-driven reports to influence stakeholders and scale organizational program impact.

Technical Portfolio & Active Architecture

PEX Project (Operational Evaluation: Statistical NLP Pipeline) | 2026

- **AI Workflow Design:** Collaborating with Patient Experience leadership to scope an automated, repeatable text-analytics workflow configuration; designed an unsupervised machine learning model layout to help teams adopt practical AI features, automate data mining, and scale sales enablement capabilities.
- **Workflow Mapping:** Designing a programmatic pipeline concept utilizing TF-IDF feature extraction and unsupervised KMeans clustering to group unstructured free-text survey feedback into interpretable service themes.

WHO Project (System Architecture & Workflow Evaluation: Healthcare Access Routing Engine) | 2026

- **Architectural Scoping:** Evaluating traditional OLAP warehouse constraints against frontline user latency needs; mapped a conceptual pivot to a serverless AWS OLTP Web Application model (AWS S3, Lambda, JavaScript) to optimize real-time, low-friction lookup performance for clinical workflows.
- **REST API Data Prototyping:** Designing a local Python data bus concept aligned with modern software development processes to ingest, clean, and denormalize complex REST APIs and mass transit infrastructure coordinates into flat, fast-filtering JSON data layers
- **Workflow Optimization:** Partnering with clinical teams to validate strategic referral assumptions, ensuring the proposed automation logic models map accurately to user needs and eliminate systemic process friction.

Quantitative Methods & Academic Projects

CIP Project (Geospatial Advocacy & Predictive Modeling) | 2026

- **Serverless ELT Architecture:** Engineered automated Python ingestion applications deployed on Google Cloud Run to stream high-volume municipal datasets via the Socrata API directly into Google BigQuery.
- **Dynamic Schema Validation:** Implemented custom data normalization routines, multi-field deduplication (QUALIFY ROW_NUMBER()), and automated schema mutation logic to handle streaming JSON variables without breaking downstream tables.
- **Kimball Dimensional Modeling:** Developed a dbt transformation architecture compiling disparate raw datasets into a unified star schema with conformed shared dimensions (dim_shared_date, dim_shared_geography) and multi-fact table tracking.

SDOH Project (Epidemiological & Social Determinants of Health Analytics Engine) | 2026

- **Multi-Layer Data Integration:** Engineered an analytical script to clean, merge, and evaluate multi-sheet municipal public health data matrices (Prevalence, Care Linkage, Viral Suppression) alongside Social Determinants of Health (SDOH) indicators across 141 conformed ZIP code zones.
- **Statistical Stability Auditing:** Programmed data-cleaning logic to isolate and map privacy-suppressed negative integers to null spaces, executing programmatic diagnostic sweeps across 10 distinct rate-stability vectors to evaluate data degradation and historical reporting risks.
- **Geographic Variance Profiling:** Executed comprehensive multi-variable correlation matrices and Poisson regression modeling with exact p-value mapping and Z-score spread models to rank descriptive geographic and demographic variations across high-risk intersectional sub-populations.

Additional Skills & Certifications

Alteryx Designer Core Certification

Alteryx

Certified TESLA Instructor (Providing Training, Instructional Design, and Adult Education)

Literacy Assistance Center Academy, New York, NY

Certified DELF A1/A2

Université de Caen Basse-Normandie, Caen, France

Certified COVID-19 Contact Tracer

Johns Hopkins University, Coursera.org

Community Leadership

Co-Founder & Event Producer | Queer Roots Cinema | 2021–Present

Co-founded and lead end-to-end production for a 30-member intergenerational community program, facilitating inclusive discussion and event logic.

Self-Care Methods

Continual academic pursuit; training in contemporary dance; tabletop RPG game mastery (collaborative storytelling)
